

THE SOLUTION

We've developed and implemented Ethics & Compliance Programs for healthcare organizations and physician-based practices across the country for over two decades. From our earliest days until today, we have served as Ethics & Compliance Officers for some of the world's largest healthcare corporations nationwide. Often times, organizations desire to be compliant but lack the expertise, resources and guidance to do so. Hiring a seasoned full-time Ethics & Compliance Officer can cost well over \$150K per year. However, through iComply247, we have created a customizable solution for only a fraction of the cost. With the expertise of our staff, our robust and innovative solution offers to our clients, senior-level compliance knowledge and experience necessary to protect their organization, together with flexibility and cost savings to make it feasible. Regulations are constantly increasing in number and complexity. Your Virtual Compliance Officer is continuously educated on changing regulations so that your organization has access to the most recent, most critical information in order to make strategic decisions.
